## Project Health Monitor

by 2021-02-23

ITERATION	SPRINT 1	SPRINT 2	SPRINT 3	SPRINT 4	SPRINT 5	SPRINT 6	SPRINT 7	SPRINT 8	SPRINT 9
SCOPE <sup>[4]</sup>	●	●	●	●	●	●	●	●	●
SCALE <sup>[4]</sup>	●	●	●	●	●	●	●	●	●
SKILL	● <sup>[3]</sup>	● <sup>[3]</sup>	●	●	●	●	●	●	●
OUTSIDE FACTORS	●	● <sup>[1]</sup>	● <sup>[1]</sup>	● <sup>[1]</sup>	●	● <sup>[2]</sup>	● <sup>[2]</sup>	● <sup>[2]</sup>	●

**Outside factors** include school work, tests, issues with the partner company, etc.

Explanations:

- [1] Due to a dispute with the partner company some pressure was put onto the project team including a raise in administrative work on the project. After the end of the cooperation the project's scope and (slightly) its scale were reduced, removing some features requested by the partner that would not be needed for the project much longer.
- [2] In Sprints 6-8 due to more school stress, exams, etc. the decision was made to cut down on project work and instead work on school tasks and our diploma theses. This was possible as the project was ahead of its planned goals.
- [3] Both the Frontend and Backend Teams had to learn about the technologies used in the project.
- [4] The project's scale and scope were well-fixated before development on the product started (before Sprint 1). While some changes were made to it in Sprints 3 and 4 after parting ways with the partner company the scale was never under- or overwhelming and the scope was always clear during development.

Currently progress on the project is going well, we are meeting our milestones and sprint goals.
